## expectations

**Blockchain**

A pixelated, grayscale version of the text "SQUARED". The letters are thick and blocky, with a jagged, pixelated edge. The color is a dark gray, and the background is white. The font style is reminiscent of early digital or video game typography.

A pixelated, grayscale version of the Google logo. The letters are composed of large, square pixels in various shades of gray, giving it a retro, low-resolution appearance. The logo is centered horizontally and takes up most of the width of the image.

It's bigger than Blockchain!
